

Colour Quenching Patio Set

Brighten up your patio this summer with a splash of colour!

MATERIALS:

- Old or secondhand patio set
- Lint-free rag
- Wire brush or sandpaper
- Soap and water (if needed)
- Tremclad® Rust Primer
- Tremclad Rust Paint – colour of your choice

STEPS:

1. Set up your patio set in an open area outdoors. If completing job on your deck or patio, consider using a drop cloth or cardboard to protect from paint drips.
2. Wipe down your table and chairs and clear of all debris. You may need warm soapy water for any stuck-on messes, etc. Remove any old or flaking paint chips by lightly sanding or using a wire brush.
3. Apply one coat of Tremclad Rust Primer to the table and chairs. As always, follow manufacturer's recommendations on preparation, application, drying times and clean up.
4. Once your primer is fully dried, apply your first coat of Tremclad Rust Paint in the colour of your choice. Allow your first coat to dry fully before re-application. If necessary, apply your second coat either within 1 hour or after 24 hours. Be sure to follow these time frames closely for best paint results.
5. Now that you have satisfied your desire for colour, quench your thirst with a refreshing glass of lemonade served at your new table!
